## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 6 and 12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 6 and 12 recite "for a detection of cornering, no energy recuperation is performed". This recitation is narrower than the original disclosure.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 10-329681.

JP 10-329681 discloses all the limitations of the instant claims including: modifying the slowdown at the at least one wheel brake, or leaving an overall slowdown of the vehicle essentially constant, wherein the at least one suitable measure is performed as a function of at least one of a comparison of a recorded braking variable to at least one predefined threshold value, a driving situation, and an operating state of a vehicle component located in the vehicle during a braking procedure, and wherein the suitable measure includes unloading of the wheel brakes by a utilization of energy-absorbing components of the vehicle. Note in response to a noise detection signal, the hydraulic braking FL is reduced and the regenerative braking FG is increased to keep the total braking FALL constant.

Regarding claims 2, 6, 8 and 12, note [0058]. The rear wheels are unloaded and the regenerative force of the front wheels compensates.

Regarding claims 3 and 9, note FL is indicative of a braking power of the wheel brake.

Regarding claims 5 and 11, note the battery charge is considered. [0005].

### ***Response to Arguments***

Applicant's arguments filed 5/15/2007 have been fully considered but they are not persuasive.

Regarding JP 10-329681, note [0058]. The rear wheels are non-driven and hydraulically unloaded and the regenerative force of the front wheels compensates. It is maintained that this reads on the recited "wherein for the redistribution of the retarding

Art Unit: 3683

force to energy-absorbing components, a displacement of the braking force distribution from the wheel brakes of a non-driven axle to the wheel brakes of a driven axle is performed.” Regarding claim 6, note the 112 1<sup>st</sup> rejection above.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
